PIXEL LED BAR SERIES

Pixel LED BAR RGBW and Single white light is the latest powerful LED modular bar by Arena Luci, available in two versions, 1 meter and half meter, that enables an endless layout of patterns and graphic display. Mounted on large surfaces, TV theatres and live-show stages, Pixel LED BAR can also be used to screen low resolution video-footage and shining set designs owing to its capability of driving each single fullcolour LED independently. Such an advanced digital experience is achieved with a 6 / 12 LEDs module that may be easily configured on a stage or a television set to create a dynamic and extraordinary brilliant performance. In addition, a truly comfortable set up an invariable pixel pitch for a uniform visual pattern layout. Featuring RDM addressing technology, remote firmware update, integrated electronic driver and full digital control over all functions, this state of the art versatile module is the ultimate pixel x pixel lighting solution.

BIG THEATER / TV FRESNEL LED | Series 600/450/300/250 (Barndoor Not included)

Replaceable LED module with high efficiency, long life, DMX and digital display control function, tunable white from 2700K to 6500K, high CRI>95, TLCI>90 or RGBW and **motorized or manual adjustable zoom**. The control by DMX Allows the coordinations with any other device, avoiding the use traditional dimmer dedicated lines. The dimmer has a soft and linear setting from 0 to 100% without any flickering. These professional spotlights **are available in different performance levels**. Depending on the model, with motorized zoom, DMX/RDM or with a high-resolution potentiometer for control. Thanks to the **high CRI value of >95**, they can also be used in museums, exhibitions, etc. without any problems and thanks to the **high TLCI (Television Lighting Consistency Index) of more than 90**, these spotlights are perfectly suited for use in TV and broadcast productions.

FLOODLIGHTS for Background Lighting, Photo, Video, TV | Marte & Scena Series

MARTE CCT is a **cutting-edge floodlight** with LED technology **with dynamic white adjusting**, the correlated color temperature is **adjustable from 3000K to 5700K** with DMX as well as control through manual high precision potentiometers to adjust the colour temperature and dimmer from 0 to 100%. Possibility to rewrite the color temperature displayed on the LCD display. Available also without manual potentiometers. **SCENA RGBW LED** is a cutting-edge asymmetrical Floodlight with **source RGBW**, available with two power range: 300W and 150W, produces a broader and richer spectrum of whites and a more vivid, nearly limitless color palette by the RGBW model which adopts the latest compound-eye optical technology for mixing colors. **The integrated double-frost filtering technology allows micron-grade light precision and homogeneity.** Full gamut color mixing capabilities with flattering, true to life color rendition. Vibrant and evocative color output that eliminates the need for cumbersome accessories such as gel changers.
