VSSL Streaming Amplifiers (more than Sonos!)			
A.1	1 x 2 Channels (2 x 50W@8/4Ω), 1 Zone, 1 Local Source, Airplay & Chromecast embedded Streaming Amplifier	690.00	
A.3	3 x 2 Channels (6 x 50W@8/4Ω), 3 Zones, 3 Local Sources, Airplay & Chromecast embedded (for each zone!) + party-zones	2'227.00	
A.6	6 x 2 Channels (6 x 50W@8/4Ω), 6 Zones, 6 Local Sources, Airplay & Chromecast embedded (for each zone!) + party-zones	4'167.00	
• NATIVE STREAMING:	<p>VSSL uses Native Streaming to connect your speakers to the music apps that you already know and love. Native Streaming is already integrated into your phone through Airplay, Chromecast built-in, and Spotify Connect. By adding a VSSL to your system you simply play what you love to the room you want.</p> <p>With other systems you have to login to your account on each device that you want to stream music from. With VSSL all you need is an internet connection and anyone can play their music with your VSSL. No login, accounts, or 3rd party apps. Just you, your friends and family and their music.</p> <p>Just play over WiFi – any device, any audio, any App – no 3rd party App – no accounts – no cables!</p>		
• PARTY-ZONES:	<p>Configure Party-Zones with the VSSL-App (one-time configuration). Then you can also easily select parent groupings of multiple physical zones from your music App. Of course, without latency between the rooms!</p>		
• VOICE-CONTROL:	<p>VSSL works with Google Assistant! Giving you another simple way to play music to your Home audio system.</p>		

Home Theater Speakers

Revolve In-Ceiling Series TruGrip™ Tool-less with QuickConnect™
